PREPARATION

- 1. Fill the kettle with at least 1 litre of fresh tap water (do not use water that has been boiled before).
- 2. Boil the water. Boiled water should be used immediately. Take care when handling freshly boiled water.

- **3.** Clean and disinfect the surface you are going to use.
- 5. If you are using a cold-water steriliser, shake off any excess solution from the RapidCool™ Flask, bottle and the teat, or rinse them with cooled boiled water from the kettle (not tap water).

- **4.** It's important that you wash your hands.
- 6. Stand the RapidCool™ Flask on the cleaned, disinfected surface.

MAKING THE FEED

8. Follow the formula manufacturer's instructions and pour the amount of boiling water you need into the RapidCool™ Flask. Double check that the water level is correct. Always put water in the RapidCool™ Flask first, while it is still hot, before adding the powdered formula.

Immediately add milk formula from milk powder dispenser.

7. Loosely fill the scoop with formula powder, according to the manufacturer's instructions, then level it using either the flat edge of a clean, dry knife or the leveller provided. Different tins of formula come with different scoops. Make sure you only use the scoop that comes with the formula. Empty each levelled scoop into the milk powder dispenser provided.

- **9.** Screw the digital lid onto the RapidCool™ Flask, ensuring it is fully tightened.
- **10.** Shake the RapidCool™ Flask well to ensure formula powder is fully dissolved.
- 11. To check if feed is ready to dispense into a baby bottle, tilt the RapidCool™ Flask sideways. The lid will show a green Nuby logo when the feed is ready.

12. When Nuby logo glows green, empty contents of the RapidCool[™] Flask into a clean, sterile bottle.

15. If there is any made-up formula left in the bottle after a feed, throw it away.

13. Fit teat into retaining ring, taking care to avoid unnecessary contact with teat nipple, and screw retaining ring onto the bottle base.

14. Test the temperature of the formula on the inside of your wrist before giving it to your baby. It should be body temperature, which means it should feel warm or cool, but not hot.

16. Clean all parts thoroughly and sterilise immediately after feeding.

DIGITAL LID

The integrated thermometer will activate the digital screen when it contacts water. The Nuby logo will light up and a colour. Colour indications are described below:

Green	Amber	Red
Feed is ready to dispense into bottle	Feed is too hot, please wait	Feed is too hot, please wait

COOLING TIMES

Cooling times should be used as a guide only. Always check food temperatures before feeding. Always follow formula powder manufacturer's instructions for making a feed.

Feed Size (ml)	Water Volume (oz)	Time to Cool (mins)
90	3	2
120	4	2
150	5	3
180	6	4
210	7	5
240	8	5

RAPIDCOOL™ FLASK RESET TIMES

Sterilisation/Cleaning Method	Reset Time*
UV Sterilisation**	3 hours
Cold Water Sterilisation**	3 hours
Steam Sterilisation	4 hours
Dishwashing Cleaning	3 hours

^{*} when sterilised immediately after use

The RapidCool™ Flask works by absorbing heat from hot liquids. After being exposed to heat, it will require a minimum of 3 hours before being ready to use again.

^{**} these sterilisation methods do not generate heat and therefore do not activate the flask. If RapidCool™ Flask is cool to the touch, it can be used immediately after these sterilisation methods.

STERILISATION & CLEANING METHODS

STORAGE

- Do not store in direct sunlight or near a source of heat.
- Do not store with or allow to come into contact with solvents or harsh chemicals.
- · Keep all components not in use out of reach of children.
- Do not leave in direct sunlight or heat, or leave in disinfectant ('sterilising solution') for longer than recommended as this may weaken the product.

WARNING!

- · Adult use only.
- Inspect before use. Throw away at first signs of damage or weakness.
- Always stir heated food to ensure even heat distribution and test temperature before serving.
- Always check food temperatures before feeding.
- When making up a feed, follow the formula milk manufacturer's instructions.
- · Please keep out of reach of children.
- · Do not use in microwave oven.
- Do not use with any other liquid than water.
- Using RapidCool[™] Flask shortly after heating in any way may cause excessive external temperatures and risk of burns. Always allow RapidCool[™] Flask to reset before use and handling.
- Handle freshly boiled water carefully. Handle RapidCool™
 Flask carefully as the bottle base will heat up when in use.
 Do not prepare feed directly next to baby. Leave
 RapidCool™ Flask to cool after steam sterilisation.

END OF LIFE

At end of life, dispose of whole product. Do not attempt to remove battery. Contact local waste authority for advice on disposing of electrical goods.

NHS GUIDELINES

Always prepare a feed to NHS guidelines

Preparing A Feed

Important - Ensure the RapidCool™ Flask, flask lid, feeding bottle and parts you plan to feed with have been cleaned and sterilised before use.
