sense and simplicity

Highlights

Convenient for travel

The Philips AVENT Microwave Steriliser has been designed to fit most microwaves on the market. Its small size makes it convenient for travel, ensuring that you always have a sterile bottle when you are going on a short overnight trip or on a longer holiday abroad. Also ideal as an extra steriliser for at the grandparents' house. Dimensions: 166 (H), 280 (W), 280 (L) mm.

Ready in 2 minutes

Just add water, load and place in the microwave for as little as 2 minutes. The exact length of the cycle will depend on the wattage of your microwave: 2 min at 1100-1850 Watt, 4 min at 850-1000 Watt, 6 min at 500-850 Watt.

Clips close the lid securely

The microwave steriliser has clips on the side for extra safety. The clips close the lid securely so hot

water cannot easily escape when you take the steriliser out of the microwave. The side grips have also been designed to stay cooler to help you handle the steriliser safely.

Kills 99.9% of harmful germs

Sterilising protects your baby from particularly harmful bacteria until his immune system is strong enough. Philips AVENT Sterilisers use the hospital method of steam sterilisation, which is quick, easy and effective, with no chemicals involved. Contents stay sterile for 24 hours if the lid is unopened.

BPA-Free

This steriliser is made from BPA-Free materials
